

**LumeCel™**  
Powered by Light

**SUSTAINABLE  
SOLUTIONS**

**MADE WITH POST CONSUMER RECYCLED CONTENT**

Every year, millions of tons of plastic are thrown into landfills or end up in oceans. Reusing recyclable materials helps to reduce the flow of plastic that ends up as waste.

**63% FEWER VOCs VS STANDARD AEROSOL**

VOCs are an important pollutant because of their contribution to the formation of ground-level ozone. When VOCs are released into the atmosphere, they react with nitrogen oxides (NOx) to create ozone molecules.

**Innovative Technology**  
Proactive days-to-refill display, and optional audio tone

**Easy, Flexible Programming**  
Program to meet your needs for maximum cost control

**Stop Changing Batteries**

LumeCel's rechargeable energy cell and advanced solar panels make the Microburst 3000 completely self-powered by indoor and natural lighting.

**10-Year Limited Warranty**

Fully guaranteed against defects of parts and workmanship.

**RECYCLABLE REFILL COMPONENTS, REQUIRES NO PROPELLANTS OR VOCs**

When released into the atmosphere, volatile organic compounds (VOCs) react with nitrogen oxides (NOx) to create harmful ozone molecules. The TCell™ passive air care system operates using natural air flow to deliver consistent fragrance, rather than relying on propellants.

All Green Seal Certified® products must demonstrate an effective level of performance via an objective, scientifically validated method conducted under controlled and reproducible laboratory conditions. Certification is based on Green Seal standards, which contain performance, health, and sustainability criteria.

**MADE WITH RECYCLED CONTENT**

In 2018, 17 million tons of textile waste ended up in landfills, making up 5.8% of the total municipal solid waste generation.\* Reusing post recycled content in mops not only reduces the amount of waste in landfills, but can also reduce the water usage needed to create cotton materials.

**LESS DETERGENT NEEDED TO CLEAN**

Synthetic surfactants contained in laundry detergent reduce the tension of the water's surface, making it susceptible to pollutants such as car exhaust and pesticides. This further impacts the aquatic environments and makes it even harder for the marine animals in these environments to flourish.

|-------------|------------------------|
| FGQ95088YEL | HYGEN™ CHARGING BUCKET |

**LESS CHEMICAL DISPOSAL VS TRADITIONAL BUCKET SYSTEMS**

The Pulse Mopping system's on-board reservoir and user-controlled release of solution give the user total control over the usage of chemical allowing only the most necessary amounts to be used.

**PROMOTES GREATER RECYCLING**

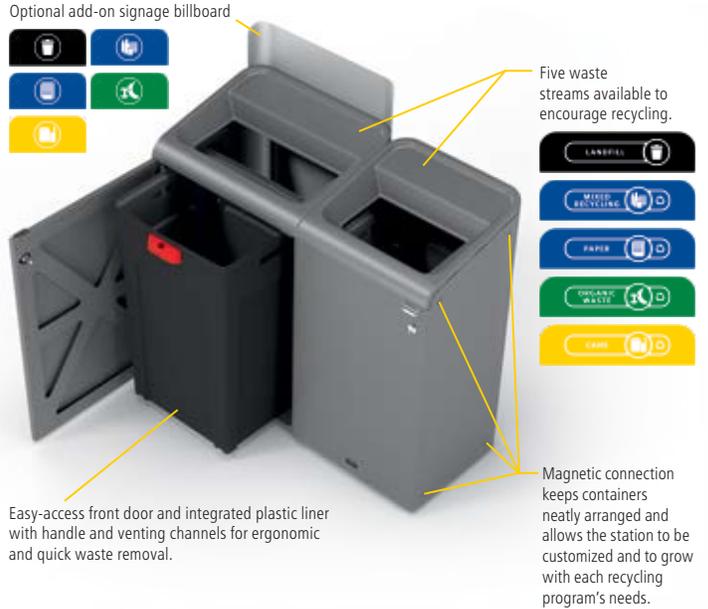

Sustain recycling station promotes intuitive recycling for greater recycling. A variety of color-coded lids with dedicated lid openings and waste stream labels clearly indicate streams to patrons and has been shown to increase recycling effectiveness by an average of 22%\*.
